What questions do you have before you find out how to answer this problem?

(Extremely important part, and for many, a very hard part, of remediation; will not be accepted without a valid and worthwhile response!!!)

RE-DO the entire problem, parts a, b, and c when applicable.

You do not need to re-write the question, but all work and Data used needs to be shown.

Teach me the how's and why's needed to be understood to be able to answer this question and any like it.

Where in the book, notes, and Specific H.W. problem could we have learned how to do this Problem?
